Velvet Bloom Restaurant

1. Introduction

Velvet Bloom is a restaurant website designed to display food items, menu categories, prices, special offers, and restaurant contact information in one place. The website introduces the restaurant with the message “Where cravings meet creativity” and aims to provide visitors with an attractive and convenient way to explore its food collections.

The website includes starters, biryani, mocktails, ice creams, fast food, popular dishes, limited time offers, an About section, and a Contact section. Food images and prices help customers understand the available options before contacting the restaurant.

The webpage is structured using HTML and links to an external CSS file for styling.

2. Features of the Website

1. Home Page: Introduces the restaurant with a welcome message and menu navigation links.
2. Food Menu: Displays vegetarian and non-vegetarian starters, biryani, mocktails, ice creams, and fast food.
3. Food Images and Prices: Shows food pictures, item names, descriptions, and prices.
4. Popular Dishes: Highlights selected dishes for customers to explore.
5. Special Offers: Displays combo deals, discounts, and promotional prices.
6. Section: Explains the restaurant's motto and dining experience.
7. Contact Section: Displays the restaurant's location and contact details.
8. Navigation Menu: Provides links to different sections of the webpage.

3. Applications

- Restaurant Advertising: Promotes the restaurant and its food items.
- Online Menu: Helps customers explore dishes and compare prices.
- Offer Promotion: Displays discounts and combo meals to attract customers.

- Customer Information: Makes restaurant contact details easily accessible.
- Small Business Promotion: Provides an online presence for a restaurant or café.
- Food Selection: Helps customers decide which dishes they may want to order.
