GYMFIT Fitness Center

1. Introduction

GYMFIT is a fitness center website designed to provide information about gym facilities, workout programs, membership plans, and contact details. It helps visitors understand the services offered by the fitness center and explore suitable membership options.

The website includes sections such as Home, About Us, Programs, Membership Plans, and Contact. It uses a modern dark theme with red highlights, attractive images, and clearly displayed buttons to create a fitness-focused design.

The webpage is developed using HTML and CSS and is designed to work on both desktop and mobile screens.

2. Features of the Website

- Home Page: Displays a welcome message and a “Join Our Gym” button.
- About Us: Introduces the fitness club and its approach to helping people achieve their fitness goals.
- Workout Programs: Displays strength training, personal training, and cardio fitness.
- Membership Plans: Provides three options: Basic, Premium, and Pro, with monthly prices.
- Contact Form: Collects the visitor's name, email address, phone number, and fitness goals.
- Navigation Menu: Helps users move between the different sections.
- Responsive Design: Adjusts the layout for smaller screens using CSS media queries.
- Hover Effects: Adds visual effects to buttons and program cards.

3. Applications

1. Gym Promotion: Advertises gym facilities and services to potential customers.
2. Fitness Program Information: Explains the different workout programs available.
3. Membership Selection: Helps visitors compare membership plans and prices.

4. Customer Enquiries: Provides a form for visitors to enter their details and fitness goals.
5. Fitness Business Management: Serves as a basic online presence for a gym or fitness center.
6. Mobile Information Access: Allows users to view gym details on mobile devices and computers.
